In a post-apocalyptic future, where everyday items have become valuable luxuries, it's your job to procure the goods your community desires.

- A robust barter-based economy. Wheel and deal with other players and communities.
- Satisfy citizen demands with sets of luxuries to earn VPs and favors.
- Use favors to gain extra actions or storage.

- Donate supplies to deal with ongoing events.
- Work together to fill dreaded shortages in community necessities.
- Shortages have less effect on trailing players, giving them a chance to catch up with leaders.
